

THE POWER OF TIME-RELEASED VAPOR

\$40 MILLION IN SAFETY/EFFICACY DATA W/E.P.A.

- * Completely safe when used properly
- * Labeled for foodservice establishments
- * Vapors are clean and odorless (no residues)
- * Registered in all 50 states
- * Technology available nowhere else in the world

GUARANTEED RESULTS

- * EPA approved/labeled claims
- * Guaranteed when used properly
- * Manufacturer's \$ back guarantee
- * Prevents future infestations
- * Round the clock protection

TIME-RELEASED VAPOR TECHNOLOGY

Once freed from its specially fabricated foil package, the exposure to air will activate the key ingredients in Fruit Fly BarPro. Like an air freshener, the time-released vapor fills the air and every crack and crevice of an approximate 200 cubic foot space (5x5x8). The vapors are undetectable to the targeted insect. Once the insect enters the treatment space they will be infected immediately and will be killed **GUARANTEED**. Fruit Fly BarPro is not a trap and does not attract and catch insects. Application in and around feeding/breeding sites allows the targeted insect to act naturally and allows our vapors to eliminate infestations **AT THE SOURCE**. Our deep penetrating vapors are clean (leave no residues) and are odorless. Killing and protecting around the clock for up to 4 months.

CONTINUED PROTECTION, CONTINUED DEPENDENCY

No other product or service on the planet compares to the results and technology available in Fruit Fly BarPro. This is evident in our sustained customer satisfaction and re-order rates which have been maintained at 98%, nationwide since 2014.
